PROBLEMS FOR "SUN" READERS TO SOLVE

J. W. Miller Shows How to Manage a Tenace Position at Bridge.

PUZZLE FOR THE BOWLERS

New Year Task for the Checker Players-Multiplication in Cryptogram.

Bridge problem No. 204 by J. W. Miller is an excellent illustration of the proper management of a tenace position, something which is continually overlooked in actual play—a position which must be foreseen and provided for long before the tenace gets to work. Here is the distribu-

Clube are trumps and Z is in the lead nd Z want all eight tricks against any

The solution is for Z to start with the The solution is for Z to start with the spade, so that Y shall get one of that suit established and force B to discard before Z. The tenace of this suit does not matter much, because even if A does not play the queen second hand Y will win the trick with the lack. If A covers Y will also with the acceptable part in either case.

Whether B puts a trump on this trick or not does not matter, and his better defence is not to do so, but to discard a diamond, Z will trump with the jack and lead the small trump through A's queen, so that Y shall be able to make both cards of his tenace whether A plays the This would be impossible trumped with the small club and led jack, as A would refuse to cover it Y could not afford to win it.

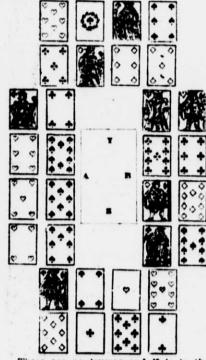

If B did not discard the diamond on the on the second trump lead, as he must keep all three of his hearts against Z's three This allows Z to diseard his small dia-mond. Now when Y leads his good spade B has to diseard again, and he must either make all three of Z's hearts nevet either make all three of Z's hearts cood or give Z two heart tricks and the

ears or they cannot be acknowledged

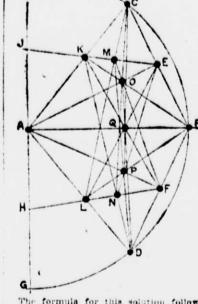

lems and so forth should send full name and address. The Sun has several com-munications on hand from persons who

give no definite address.

Here is the second of H. D. Lyman's hard problems, which he sends to readers of The Sun with New Year's greetings.

Here is the solution of the problem of granging 15 trees so that there shall be 21 rows of 3 in a row. It is from Dr. Charles E. Quimby of New Yors city, whose name is already familiar to renders of THE SUN as an expert on geometrical

The formula for this solution follows: escribe a semi-circle with the radius A-B, and make the line A-G perpendicular to A-B. Lay off one-seventy of the circumference on each side of B at C and at D. Join B-C and B-D and

sect at E and a.

D.

Dissect A—G in H and make A—J equal declaration by the partner. I should be declaration by the partner. I should be glad to see some comment on the fore-will cut the line A—C at K, and a line going in your Sunday columns."

As it is never wise to comment upon a second of play until you have tried it out J will cut the line A—C at K, and a line from F to H will cut the line A—D at L.

The other connections are obvious.

The principal thing for the solver to observe is that Q is not in line with O and P, but with O—D and with C—P, otherwise we should have five in a line instead of three. If we start to count at instead of three, life we start to count at instead of three, life we start to count at line five in a line instead of three. If we start to count at line first conclusion that they came to

AT ROYAL AUCTION

The Dealer's Opening Bid Made the Subject of a Convention.

WESTERN PLAN TRIED OUT

Four Good Players Experiment With a New Solution of an Old Problem.

Several attempts have been made so to arrange the dealer's opening bids that they shall give his partner an exact statement of the possibilities of his cards, but so far without success. He can name a sure two tricks, but there is still doubt as to whether they are both in the suit named, or one outside—goodness knows where. He can say he has not a sure trick in his hand, but he may have four kings in spite of it. He can bid to show that he can help out a no trumper, but there is no telling what part of it he can here is no telling what part of it he can-

Out in the West they are trying to remedy this defect and are experimenting along the lines of heliograph signalling, conveying all the desired information by means of two signals; one dot or two dots. Two dots means "Let this bid alone, I have the goods in this suit." One dot means "I have a dot in each of two suits, how about a no trumper?"

Here is a letter from E. M. F. of Omaha, Neb., who writes to TRE SUN explaining the system in full:

"Having been greatly interested in your Out in the West they are trying to rem

"Having been greatly interested in your Sunday articles on auction I would like our opinion as to a certain dealer's bid convention which has come quite generally into use at one of our clubs; namely, the bid of one club to show both the black suits stopped, or of one diamond for both reds. Helleving that the dealer—assuming of course that he cannot say 'without' himself—should bid with reference to a possible no trumer in his partners hand possible no trumper in his partner's hand.

possible no trumper in his partner's hand, we have found it interesting as well as useful to give the sort of information indicated by such bids.

"Naturally it goes wrong at times, particularly when the stopper is predicated on three to the queen or four to the knave, but as to the ethics of the practice—and it has been attacked by some as unsportsmanlike—it seems to me that 'it's as fair for one as the other' is sufficient answer to criticism.

"We have abandoned two spades as a no trump encouragement and instead use that bid to indicate five minor spades with one possible outside trick to help a royal declaration by the partner. I should be

otherwise we should be start to count at instead of three. If we start to count at instead of three, instead of three seek five separate rows of three trees each and then we get four more rows of three each from four other points; E. B. F and D. This gives us the required twenty-one.

Several solutions were sent in giving with a no trumper, he was usually without any suit long enough or strong enough to

solution. Various arrangements to hand seemed to be the want of definite under-Reed, Chas. D. Shuldiam. S. O. standing as to what strength there should be in the partner's hand to jus-Cariton, C. P. Johnson, P. C. W.

four of the suit and still held it safe.

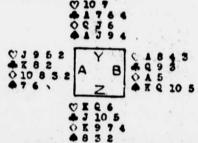

This induced Y to turn his attention This induced Y to turn his attention to the dummy's long suit of spades, remarking that under the system, Z would have bid two spades if he had had a sure trick outside. Y led the acc and then a small one, ducking the second round, on the chance that all the spades would fall on the third round when Z got in with one of his red stoppers.

Instead of going on with the clubs, B

tried the jack of hearts, which Z covered with the fourchette and A won with the king. A's only possible return was the diamond, which B won with the ace, coming through with the seven of hearts. so that A made four more tricks in that suit; just enough to set the contract. This looks like a hard luck hand for

Y, but the weakness is in Z's sileged stoppers in the red suits, one of which clearly fails to stop the heart suit. Give Z a sure stopper, such as queen, jack, ten. and Y makes eight tricks at no trumps on the same line of play. The student will find that ducking the second spade made no difference in the result, as A would wir the third round and underplay the hearts giving Z a heart trick at once

Here is one of the hands in which no one at the table had a suit of more than four cards and although the dealer and his partner fitted pretty well they could not quite win out.

has the declared suit almost certainly stopped, and the hearts quite so. A passed and Y went no trumps, having B discarding a club and trumping. B both the black suits himself. B led the spade king and it wen the trick. Being as not to have Y in the lead on the suspicious that Y was playing the Bath coup, B shifted to the small heart, which dummy won with the queen.

Y then took an acc-jack-ten finesse in

dumny won with the queen.
Y then took an ace-jack-ten finesse in clubs, which let B in to lead the ace and

trumps, or against a no trumper, even if Z were marked with the queen well
